Table 1b: Means of Study Variables at Baseline, Continued

|                                                      | (1)          | (2)               | (3)       | (4)             | (5)         |
|------------------------------------------------------|--------------|-------------------|-----------|-----------------|-------------|
|                                                      |              | Enrolled in Study |           |                 |             |
|                                                      | Not in Study | Control           | Treatment | <i>p</i> -value | Sample Size |
| <b>C. Health Claims Variables (2015–2016)</b>        |              |                   |           |                 |             |
| Total spending (dollars/month)                       | N/A          | 506               | 465       | 0.317           | N/A         |
| Office spending                                      | N/A          | 67                | 58        | 0.498           | N/A         |
| Hospital spending                                    | N/A          | 283               | 259       | 0.369           | N/A         |
| Drug spending                                        | N/A          | 103               | 101       | 0.911           | N/A         |
| Nonzero medical spending                             | N/A          | 0.899             | 0.885     | 0.253           | N/A         |
| <b>D. Health Behavior and Productivity Variables</b> |              |                   |           |                 |             |
| Sick leave (days/year)                               | N/A          | 6.05              | 6.13      | 0.707           | N/A         |
| Annual salary (dollars)                              | N/A          | N/A               | N/A       | N/A             | N/A         |
| IL Marathon/10K/5K (2014–2016)                       | N/A          | 0.107             | 0.118     | 0.257           | N/A         |
| Campus gym visits (days/year)                        | N/A          | 7.36              | 6.78      | 0.483           | N/A         |
| Sample size                                          | N/A          | 1,534             | 3,300     |                 |             |
| Joint balance test for panel C ( <i>p</i> -value)    |              |                   |           | 0.764           | 3,223       |
| Joint balance test for panel D ( <i>p</i> -value)    |              |                   |           | N/A             | 4,834       |

This table replicates Table 1b from Jones, Molitor, and Reif (QJE 2019) using public-use data. N/A indicates a censored value.
